[Supervision of students](#)

May-July 2019 **Co-advising undergraduate internship for a student from ENS Rennes, INRIA**, Nancy, France, student name: Rémi Piau.

Project: The student implemented and improved an attack designed by myself which allowed to break the signature algorithm ECDSA using partial information collected from a side-channel attack. This collaborative work lead to the paper *A Tale of Three Signatures: practical attack of ECDSA with wNAF* accepted at Africacrypt 2020 and published in its proceedings.
