

# Gabrielle De Micheli

# General Information

o Adress: Distributed Systems Lab, 3300 Walnut St, Philadelphie, PA, 19104, USA

o Email: gmicheli@seas.upenn.edu

o https://www.seas.upenn.edu/~gmicheli/

o Nationality: American, French, Italian, Swiss

# Scientific Interests

Cryptography, Security, Computational Number Theory, Lattices, Algebra (Group Theory, Representation Theory), Geometry (Riemannian Geometry), General Relativity.

# Education

#### **Current Work**

Sep 2016 - current PhD in Computer Science, University of Pennsylvania, Philadelphia, USA.

My work lies at the intersection of Mathematics and Cryptography, with particular research interests in lattice-based cryptography, computational number theory, and the Number Field Sieve algorithm. I am interested in both attacks and defenses with a particular interest in using mathematical techniques for obtaining a better understanding of the security properties of commonly used cryptographic primitives in real-world applications.

#### Past Degrees

May 2018 **Master of Computer Science**, *University of Pennsylvania*, Philadelphia, PA, USA.

Under the supervision of Nadia Heninger: Lattice-based cryptography

Oct 2016 Master of Mathematics, EPFL, Ecole Polytechnique Fédérale de Lausanne, Lausanne, Switzerland.

# **Master Thesis**

Title The Riemannian Penrose Inequality

Supervisors Prof. Marc Troyanov & Prof. Spyros Alexakis

July 2014 Bachelor of Mathematics, EPFL, Ecole Polytechnique Fédérale de Lau-

sanne, Lausanne, Switzerland.

International experience

Sep 2015-Jan 2016 Semester abroad (Master thesis), Imperial College, London, UK.

Sep 2013-June 2014 Erasmus year, Heriot-Watt University, Edinburgh, Scotland, UK.

Projects in mathematics

December 2014 Understanding gravitational multi-instantons.

June 2014 Braid Group, Hecke and Temperley-Lieb algebras.

December 2013 Galois Theory.

June 2013 Discrete Logarithm Problem on Elliptic Curves.

#### Publications

De Micheli, Shani, Characterizing Overstretched NTRU Attacks, Mathcrypt, to appear in Heninger Journal of Mathematical Cryptology, 2018.

Yarom

Dall, De Micheli, CacheQuote: Efficiently Recovering Long-term Secrets of SGX EPID Eisenbarth, Genkin, via Cache Attacks, CHES, published in IACR Trans. Cryptogr. Hardw. Heninger, Moghimi, Embed. Syst (2), 2018.

# Invited Talks and Workshops

September 2018 CacheQuote: Efficiently Recovering Long-term Secrets of SGX EPID via Cache Attacks, Security Seminar, MIT, Boston, USA. Talk

September 2018 CacheQuote: Efficiently Recovering Long-term Secrets of SGX EPID via Cache Attacks, Security Seminar, University of Pennsylvania, USA. Talk

August 2018 Characterizing overstretched NTRU Attacks, Mathcrypt, Santa Barbara, USA. Talk

Avril 2018 Hidden Number Problem: Performance Analysis, Computational Challenges in the Theory of Lattices, ICERM, Providence, USA. Poster presentation

# Teaching Experience

Feb -June 2013 **Teaching assistant for General Physics II**, EPFL, Lausanne.

# Editorial tasks

Reviewer Crypto 17', Asiacrypt 18', CHES 18'.

Translator Exercises and solutions for Analysis I and II, translation from French to English, EPFL, Lausanne, Sep 2014 - June 2015.

# Computer skills

Matlab, HTML, LATEX, Python, Sage

# Languages

Fluent English, French, Italian

Basic German
